ABSTRACT

Owing to an unfortunate mistake, the original article was published with errors which are corrected with this erratum as suggested by the corresponding author*.

Table 6 includes a patient with 20 large soft tissue sarcomas with complete response. But this should be corrected to partial response in agreement with the correct data presented in Table 7. The following corrections (indicated in bold face) of Table 6 should be noted:

Histological type	Patient age	Tumour diameter	No. of responders to D-EECT		
	(range)	(cm) (range)	CR	PR	OR
Squamous cell carcinoma					
10 patients, 14 tumours	(40-70)	5-6	3	11	14
Adenocarcinoma-breast					
3 patients, 14 tumours	(40-65)	7-8	2	12	14
Breast-infiltrated ductal carcinoma					
4 patients, 10 tumours	(50-60)	10-15	5	5	10
Poorly differentiated breast carcinoma					
1 patient, 1 tumour	(31)	8-10	0	1	1
Adenocarcinoma-rectum					
1 patient, 1 tumour	(56)	7-8	0	1	1
Squamous vaginal-vault carcinoma					
1 patient, 1 tumour	(78)	6	0	1	1
